Pillir Case Study

We produced 6 videos for Pillir's *product library.*

About *Pillir*

Pillir builds AI execution infrastructure for companies that run on SAP, Oracle and JD Edwards.

Pillir Cowork connects an AI agent like Claude to live SAP data. The agent reads the data, finds the issue, takes action with human approval, and sends the result as Excel, PowerPoint or email.

The three chapters.

I	The brief	What Pillir needed
II	The videos	Tutorials, launch and campaign
III	The work	Where the videos are used

6 *videos*

A product video library for Pillir: four workflow tutorials, a product launch film and a campaign video.

WHAT WE DELIVERED

Customer risk	Tutorial · 90 sec
Delayed production orders	Tutorial · 97 sec
Stuck purchase requisitions	Tutorial · 91 sec
Stockout risk	Tutorial · 55 sec
Product launch film	Launch
Campaign video	Campaign

Script, screen capture, motion design, voiceover and edit.

I The brief

WHAT PILLIR NEEDED · WHO THE VIDEOS ARE FOR

Show the product *doing the work.*

Pillir's buyers have heard "AI for ERP" many times. Pillir wanted videos that show its agent completing real tasks on live SAP data. We built the library around Pillir's buyers: one tutorial per buyer, each on a task they do every week, plus a launch film and a campaign video.

VIDEO	FOR	THE TASK	THE OUTPUT
Customer risk	Finance and credit teams	Find the 10 riskiest customers	Management deck
Delayed production	Production planners	Find why orders are late	Excel tracker, plant update
Stuck requisitions	Procurement leads	Chase PRs stuck over 5 days	Escalation report, draft emails
Stockout risk	Supply chain managers	Find materials about to run out	Executive summary

II

The videos

FOUR TUTORIALS · A LAUNCH FILM · A CAMPAIGN VIDEO

01

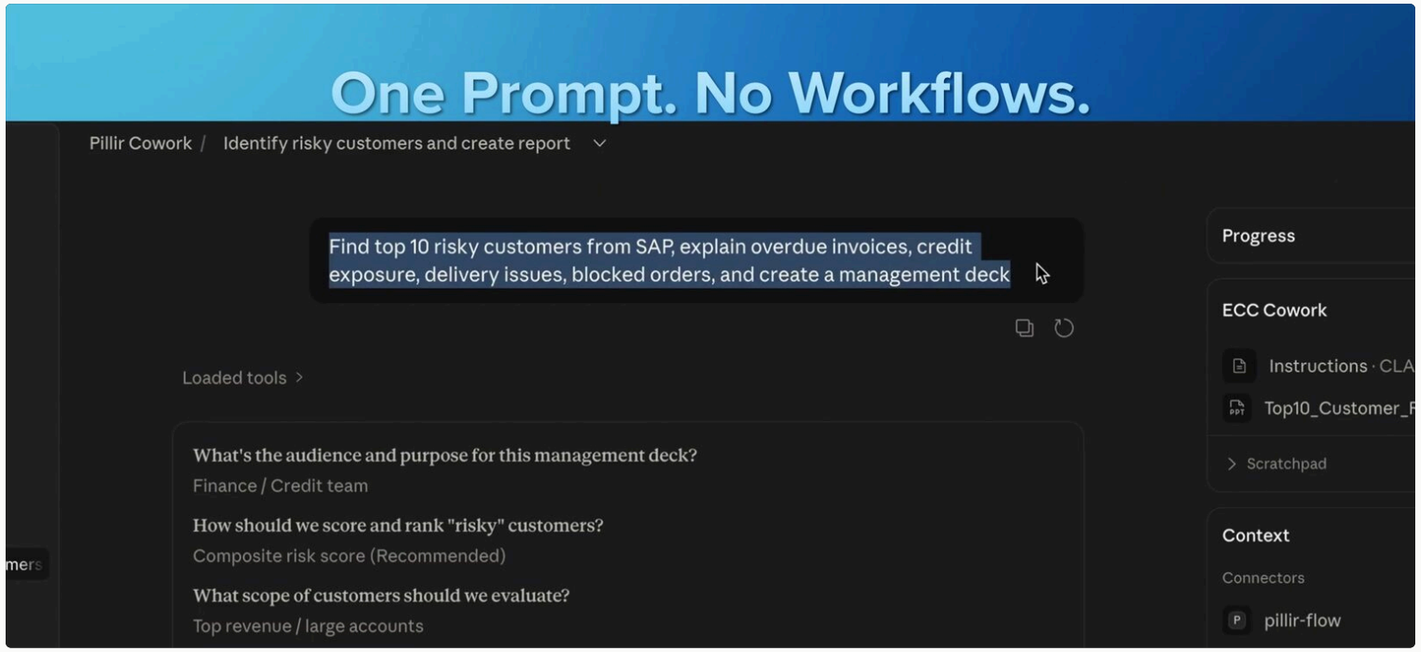

Customer risk

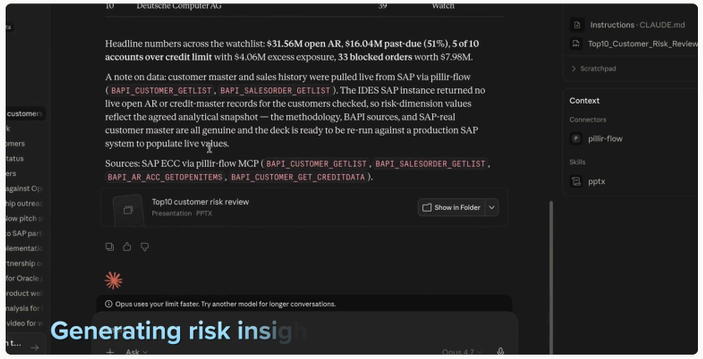

THE PROMPT

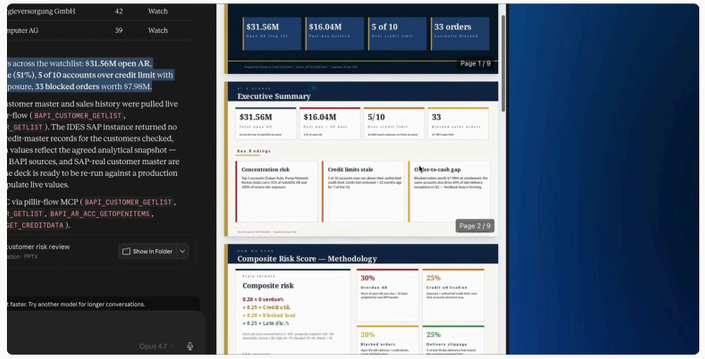

> "Find top 10 risky customers from SAP, explain overdue invoices, credit exposure, delivery issues, blocked orders, and create a management deck."

Claude pulls receivables, credit and sales data through Pillir, scores each customer, and builds the deck.

90 SEC · FINANCE AND CREDIT TEAMS

02

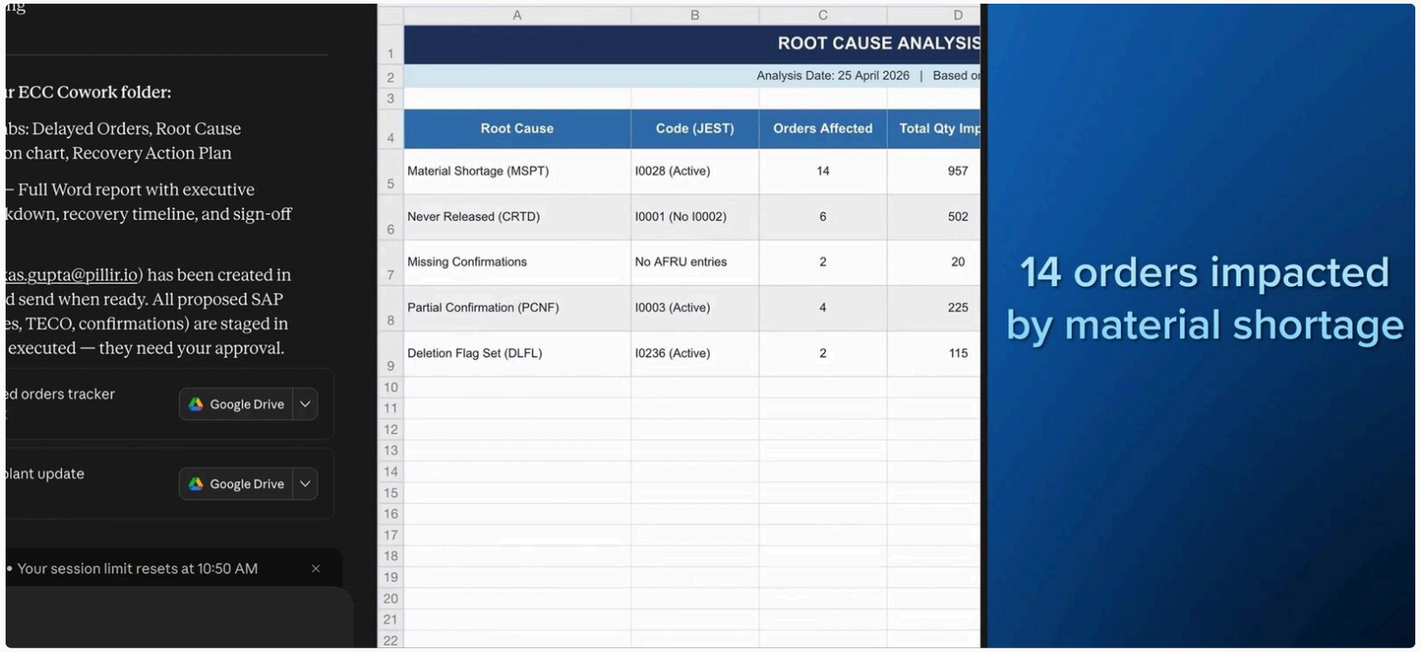

Delayed production

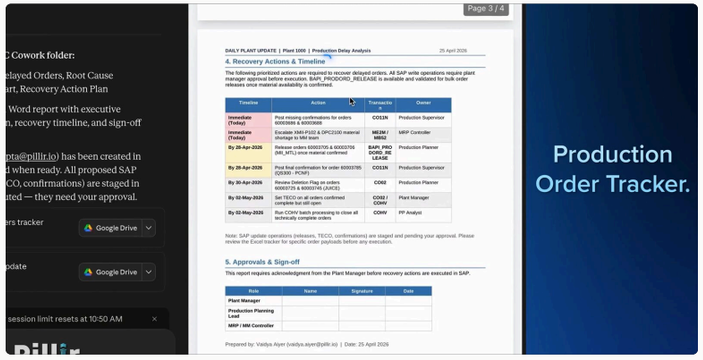

THE PROMPT

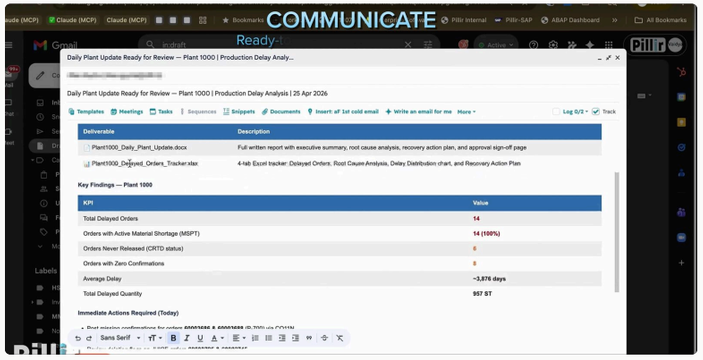

> "Analyze delayed production orders in SAP. Identify root causes such as material shortage, machine downtime, or missing confirmations. Recommend recovery actions."

Claude reviews the production orders, names the root cause, and builds an order tracker and a daily plant update.

97 SEC · PRODUCTION PLANNERS

03

Stuck requisitions

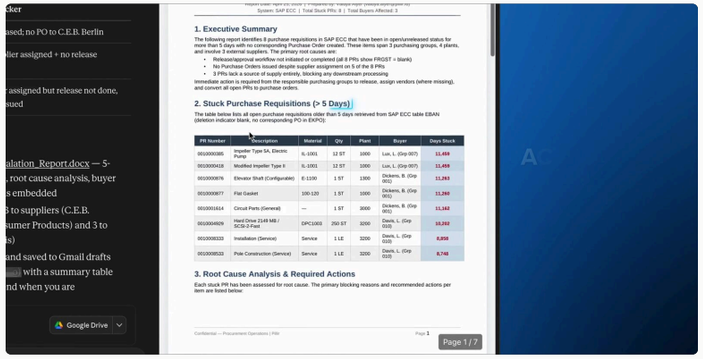

THE PROMPT

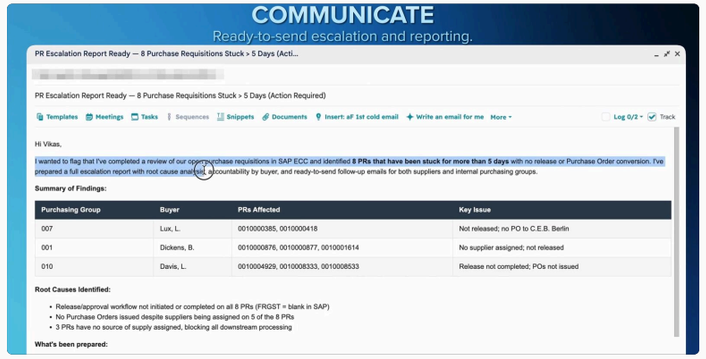

> "Show purchase requisitions stuck more than 5 days, explain why, draft supplier and internal follow-up emails, create an escalation report and notify my boss."

Claude finds each stalled requisition, traces the blocker, writes the escalation report and drafts the emails.

91 SEC · PROCUREMENT LEADS

04

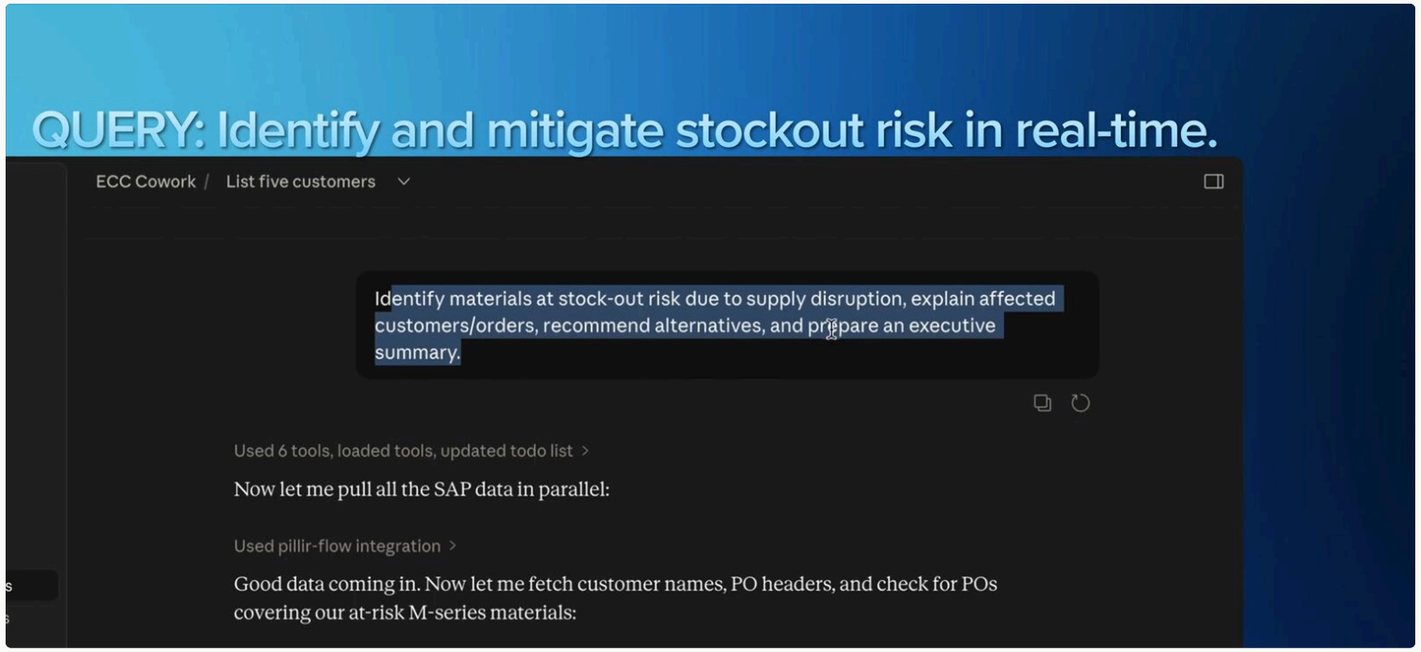

Stockout risk

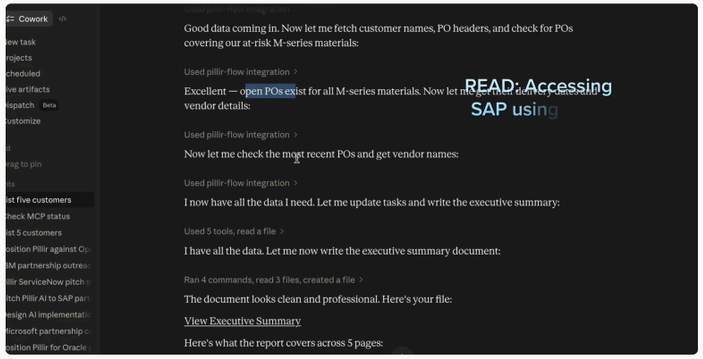

THE PROMPT

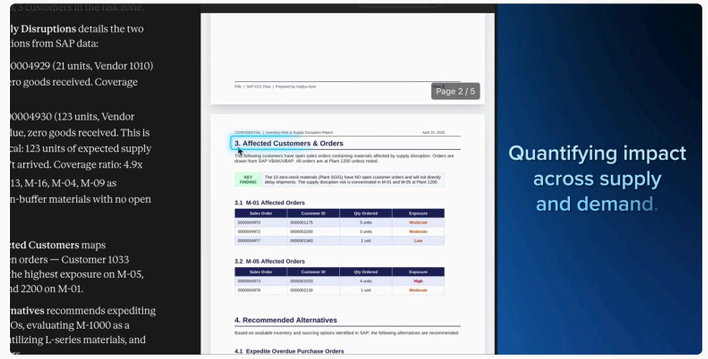

> "Identify materials at stock-out risk due to supply disruption, explain affected customers/orders, recommend alternatives, and prepare an executive summary."

Claude finds the at-risk materials, maps them to affected customers and orders, and writes a five-page executive summary.

55 SEC · SUPPLY CHAIN MANAGERS

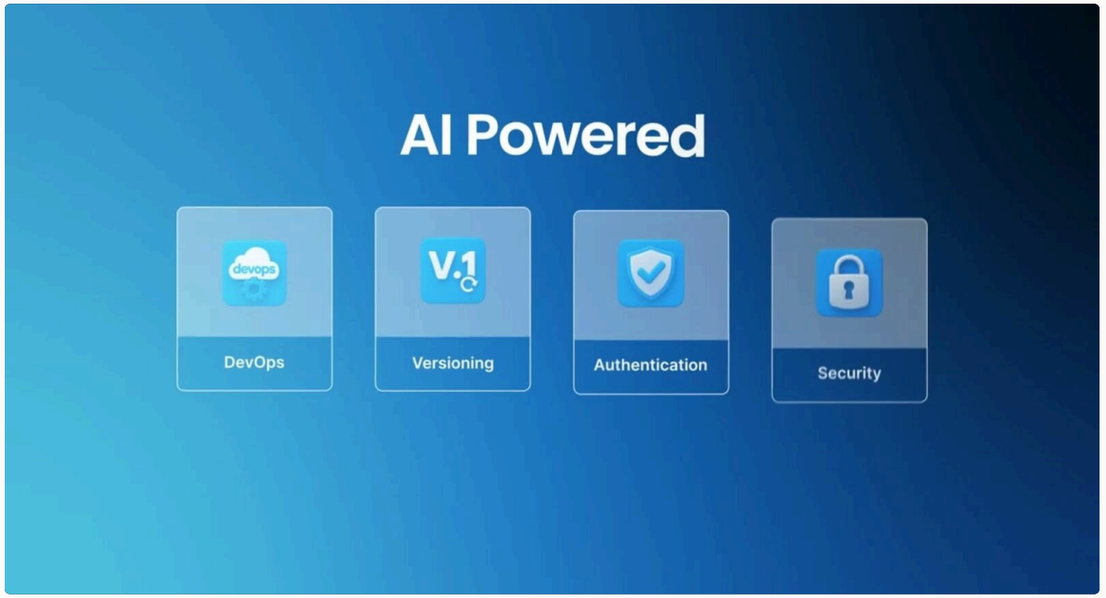

Launch film and *campaign video.*

Alongside the tutorials, we made Pillir's product launch film and a campaign video.

Product launch film

Campaign video

Watch ↗

One structure *for every tutorial.*

Every tutorial follows the same six steps. This matches how Pillir describes its product, and makes the next video faster to produce.

01
The task
The job, stated before any UI.

02
The prompt
The real request, typed on screen.

03
Read
Pillir pulls live SAP data.

04
Reason
The root cause, called out on screen.

05
Act
Reports and decks built live.

06
Send
The email to the team.

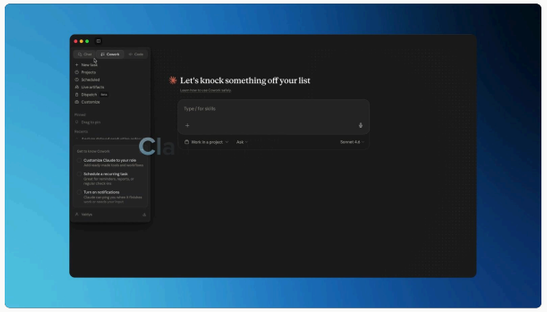

III

The work

WHERE THE VIDEOS ARE USED

See *the videos.*

Three of the four tutorials are the product demos on pillir.ai, under "See Execution in Action" and "See How It Works". Pillir also publishes them on its YouTube channel.
