Four workflows.
One prompt each.

We made Pillir's workflow film library: four short films that show Claude doing real SAP work through Pillir, from a single prompt to a report the team can act on.

About *Pillir*

Pillir is AI execution infrastructure for enterprises that run on SAP, Oracle and JD Edwards. Its line is simple: *"Any agent can suggest. Pillir executes."*

Pillir Cowork connects an AI agent like Claude to live SAP data. It reads, reasons, acts with human approval, and sends Excel, PowerPoint and email outputs. It's powerful, and it's hard to explain in words.

SAP ECC · S/4HANA · CLAUDE · ENTERPRISE AI

The four chapters.

I	The brief	WHY "AI AGENT FOR SAP" NEEDED SHOWING
II	The films	FOUR WORKFLOWS, FOUR AUDIENCES
III	The system	ONE STRUCTURE, REPEATABLE FOR EVERY WORKFLOW
IV	Where they live	HOMEPAGE, YOUTUBE, SALES

I The brief

THE PROBLEM · THE AUDIENCE · THE ASK

01

"AI agent for SAP" is *hard to picture.*

A plant manager or a procurement lead has heard "AI copilot" a hundred times. What they haven't seen is an agent pull live SAP data, find the real problem, and hand them a finished report.

Pillir needed proof people could watch, built around the jobs those buyers do every day.

/ WHAT THE BUYER HEARS VS. NEEDS TO SEE

"AI-powered ERP"	EVERYONE
"Copilot for your workflows"	EVERYONE
"Automate SAP with AI"	EVERYONE
One prompt, real SAP data, a finished report	ONLY PILLIR

02

One audience *per film.*

We mapped Pillir's solutions to the people who'd buy them, then picked one painful, everyday SAP job for each.

FILM	WHO IT'S FOR	THE JOB	WHAT COMES OUT
Customer risk	Finance and credit teams	Find the 10 riskiest customers	Management deck
Delayed production	Plant and production planners	Explain why orders are late	Excel tracker, daily plant update
Stuck requisitions	Procurement leads	Chase PRs stuck over 5 days	Escalation report, draft emails
Stockout risk	Supply chain managers	Spot materials about to run out	Executive summary, action plan

II

The films

FOUR WORKFLOWS · 55 TO 97 SECONDS · 4K

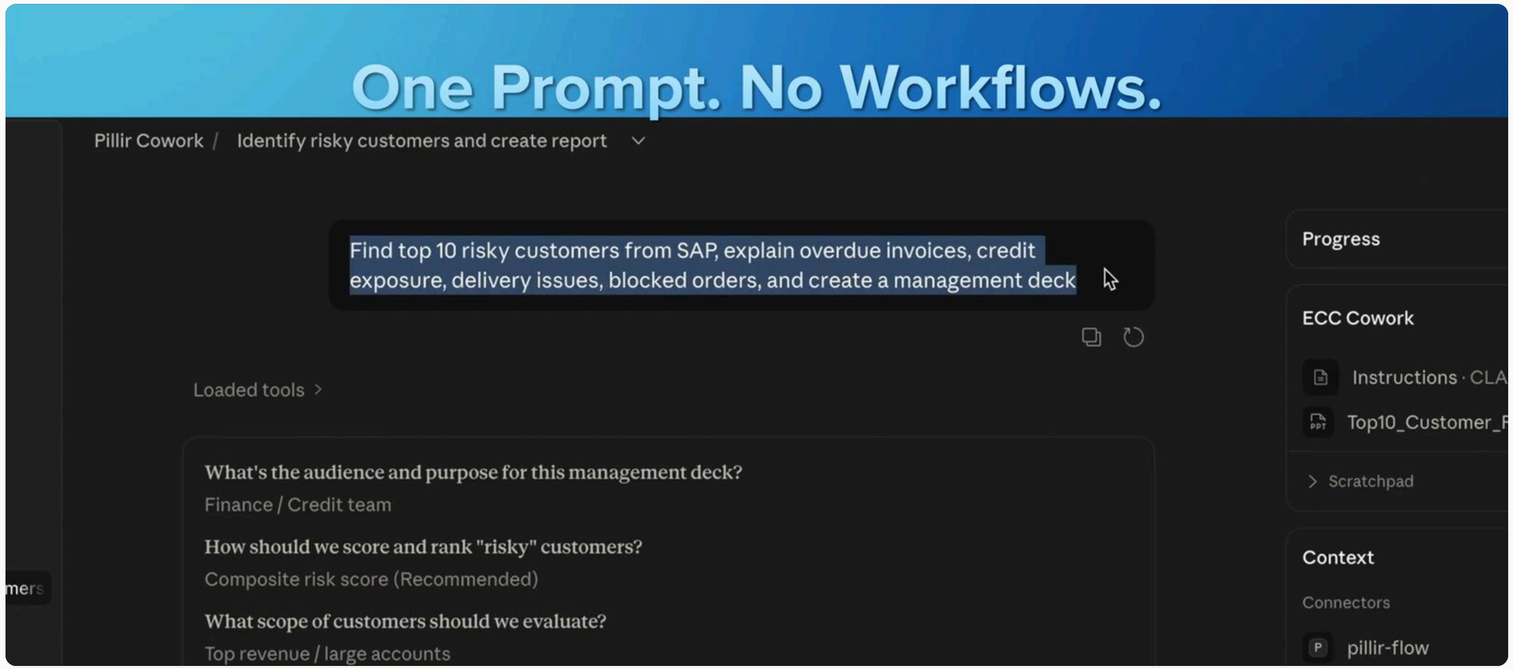

01

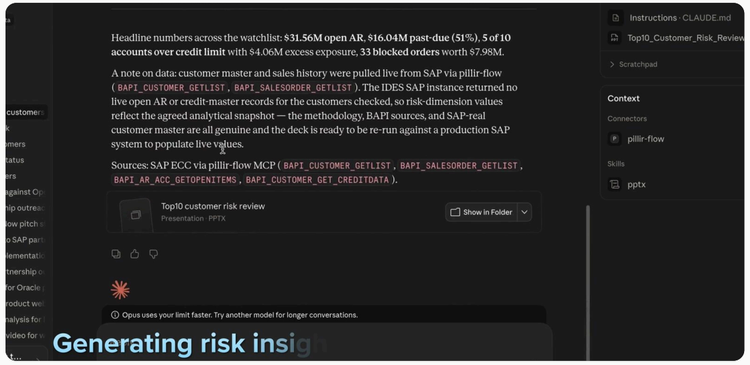

Customer risk, *in one deck.*

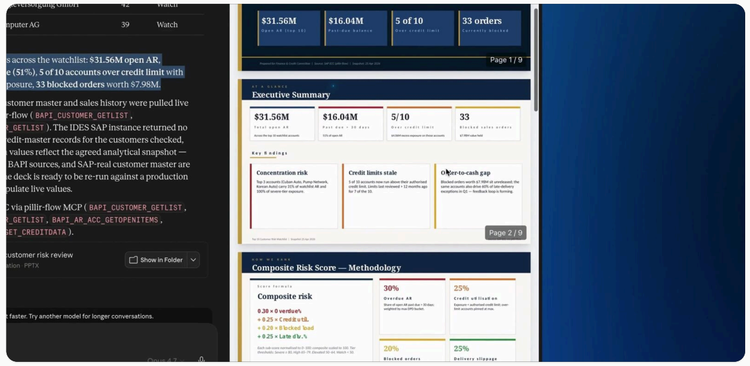

> "Find top 10 risky customers from SAP, explain overdue invoices, credit exposure, delivery issues, blocked orders, and create a management deck."

Claude asks who the deck is for, pulls AR, credit and sales data through Pillir, scores every account, then builds the deck.

/ 90 SECONDS · FOR FINANCE AND CREDIT TEAMS

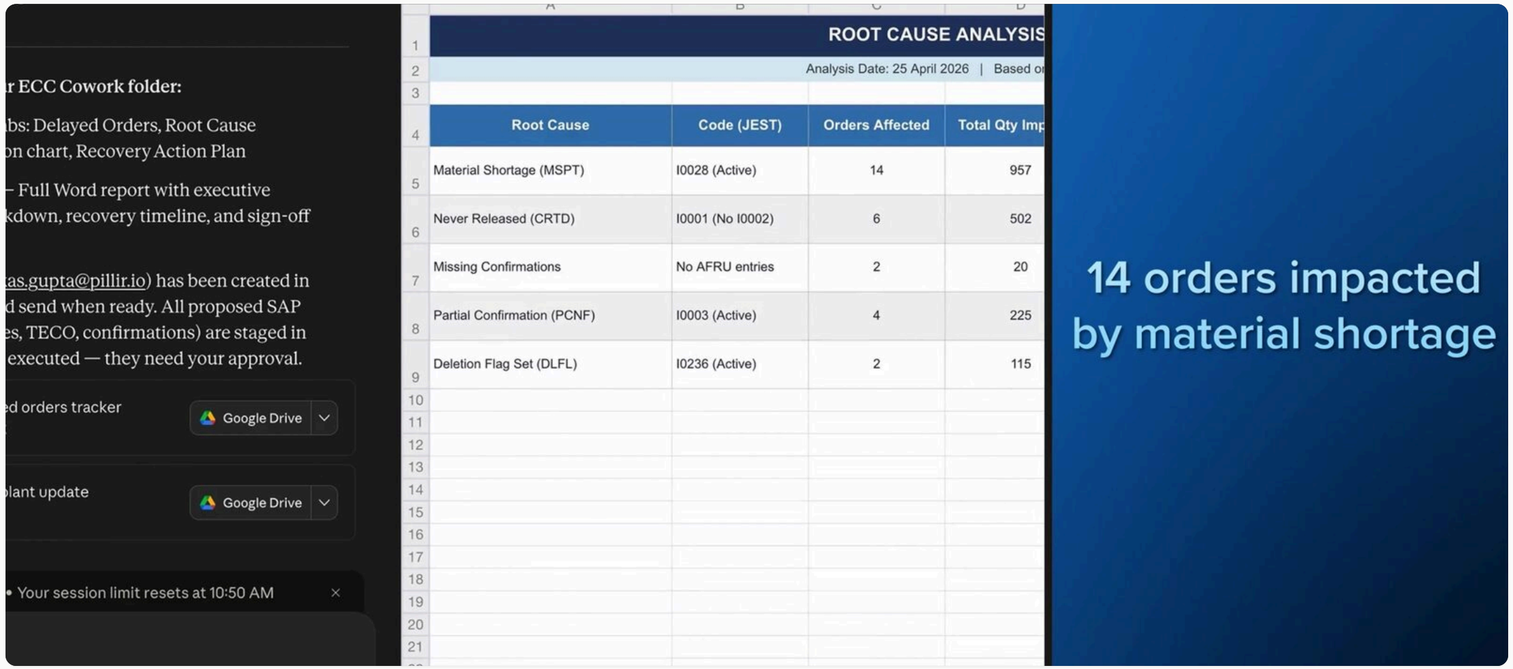

02

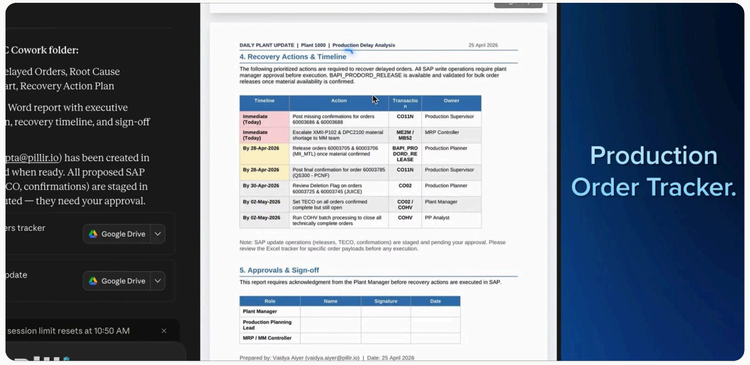

Why the plant *is running late*.

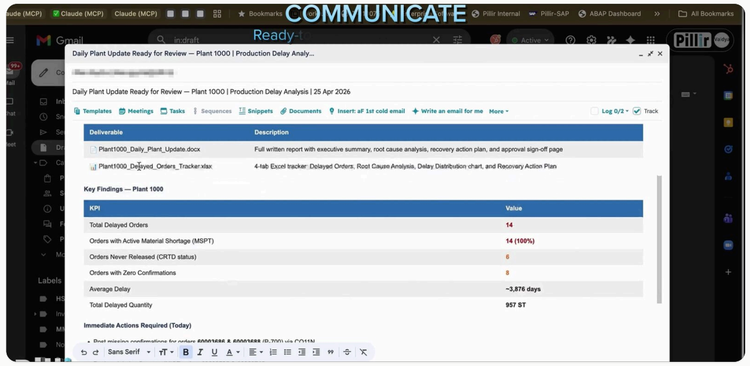

> "Analyze delayed production orders in SAP. Identify root causes such as material shortage, machine downtime, or missing confirmations. Recommend recovery actions."

The film follows Claude through the production order tables, names the root cause, then builds a production order tracker and a daily plant update for review.

/ 97 SECONDS · FOR PLANT AND PRODUCTION PLANNERS

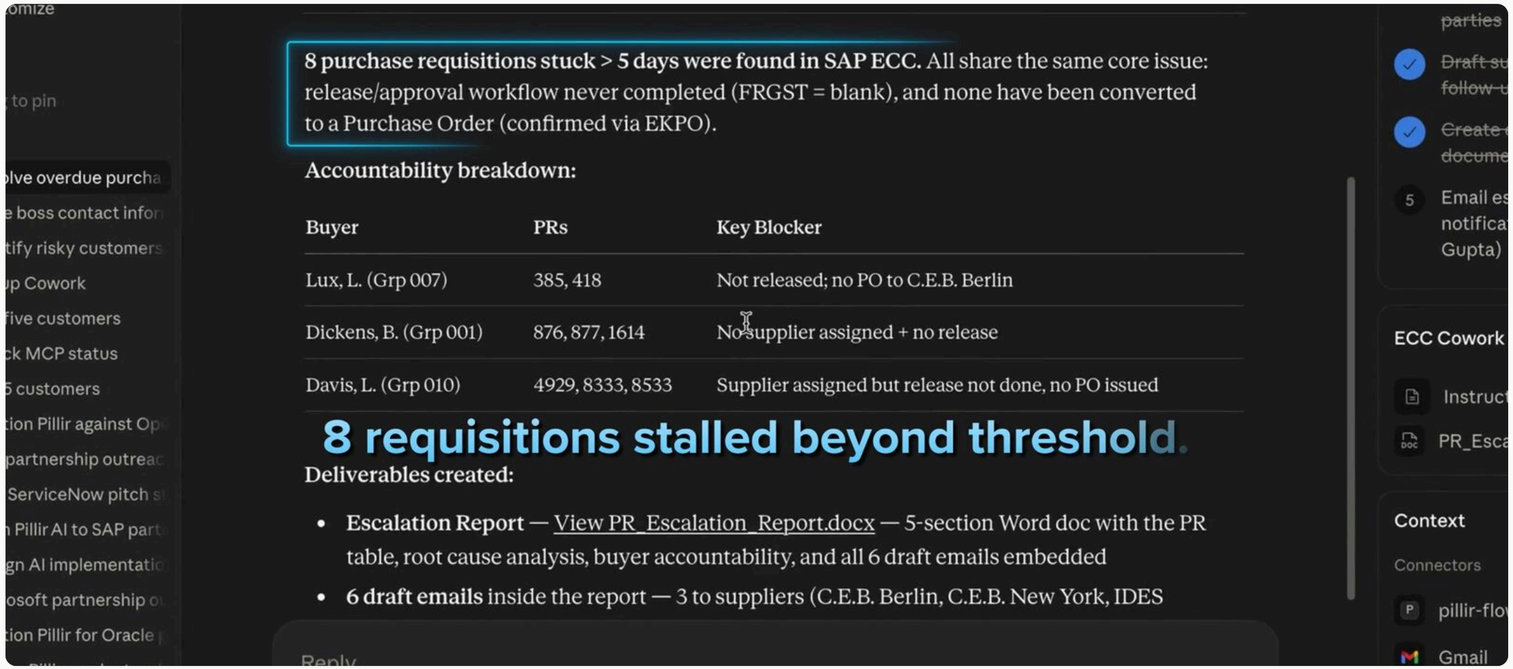

03

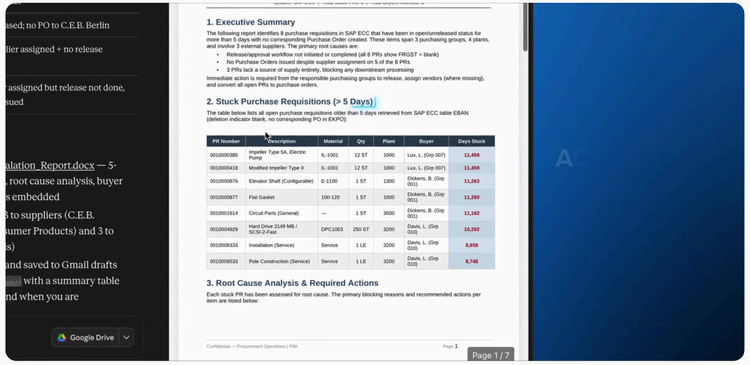

Stuck requisitions, *escalated.*

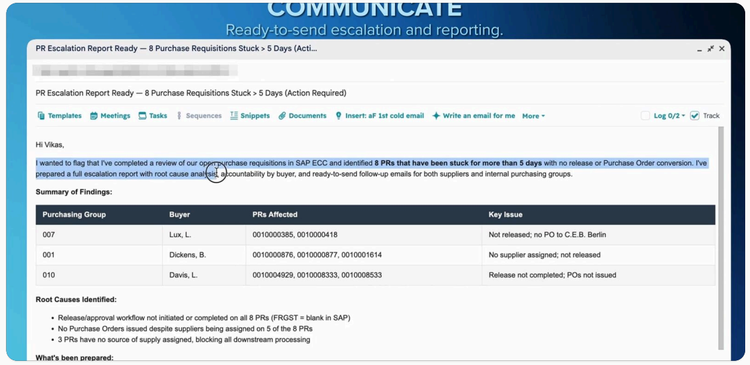

> "Show purchase requisitions stuck more than 5 days, explain why, draft supplier and internal follow-up emails, create an escalation report and notify my boss."

Claude finds every stalled PR, traces each one to its buyer and blocker, writes the escalation report and drafts the emails, ready to send.

/ 91 SECONDS · FOR PROCUREMENT LEADS

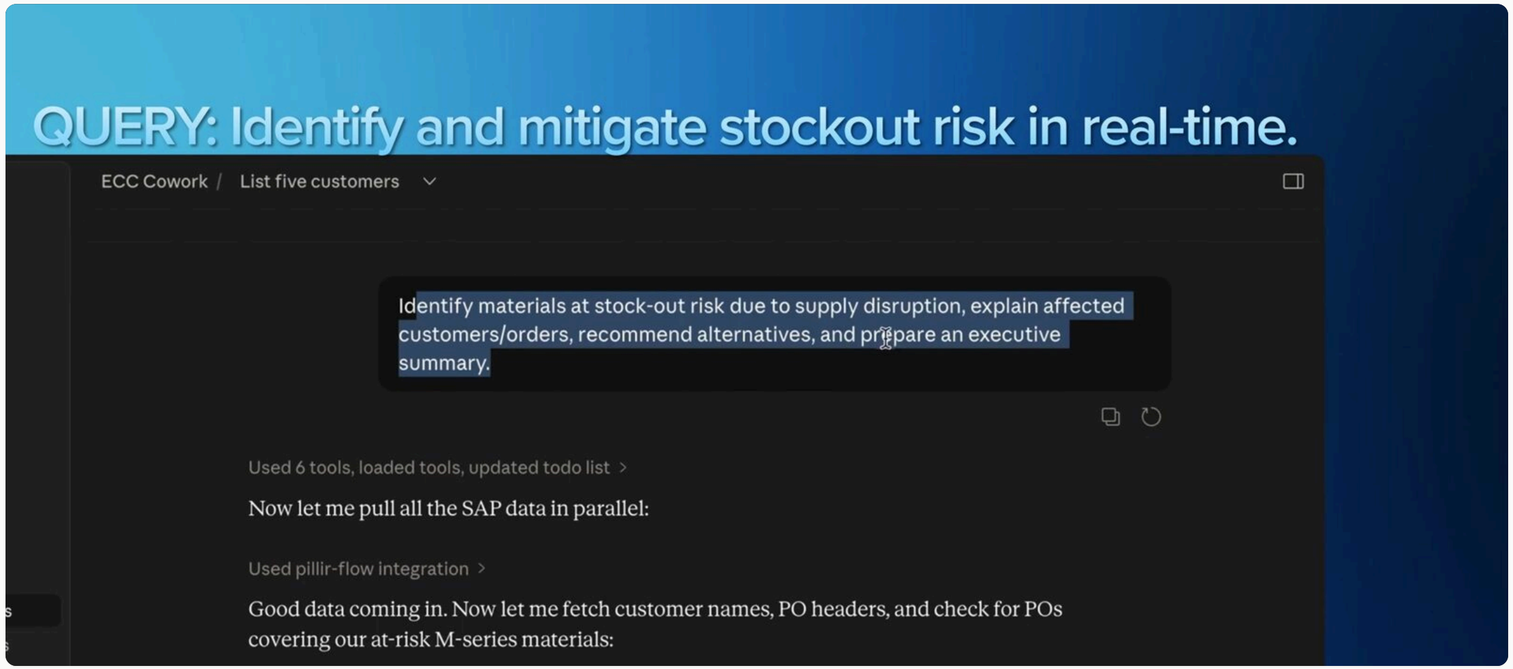

04

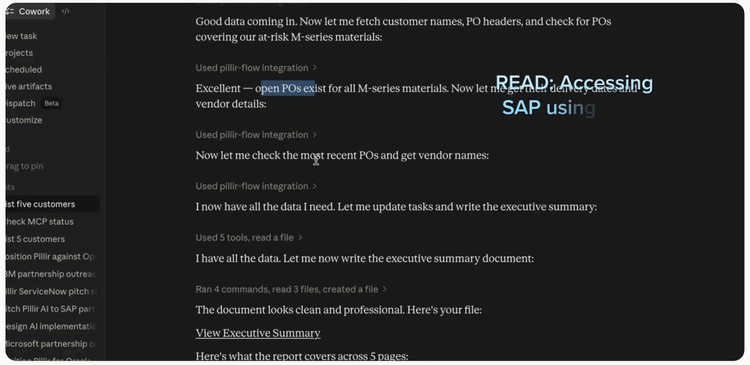

The stockout, *before it hits.*

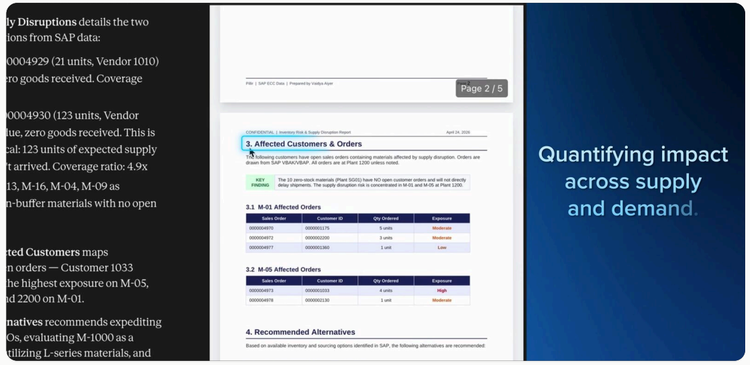

> "Identify materials at stock-out risk due to supply disruption, explain affected customers/orders, recommend alternatives, and prepare an executive summary."

The shortest film of the set. It goes from the query to a five-page executive summary that maps every disruption to the customers it affects.

/ 55 SECONDS · FOR SUPPLY CHAIN MANAGERS

III

One structure. *Four films.*

Every film runs the same beats, matched to Pillir's own Read, Reason, Act, Communicate story. That makes the next workflow fast to produce and easy to binge.

01
The hook
One line on the job, before any UI.

02
The prompt
The real request, typed on screen.

03
Read
SAP accessed with roles and authorizations.

04
Reason
The root cause, called out in a super.

05
Act
Trackers, reports and decks built live.

06
Communicate
The email that goes to the team.

/ TO RISK INSIGHTS

/ TO ACTION-READY OUTPUT

/ TO ESCALATIONS

/ TO MITIGATION PLAN

3 *of 4*

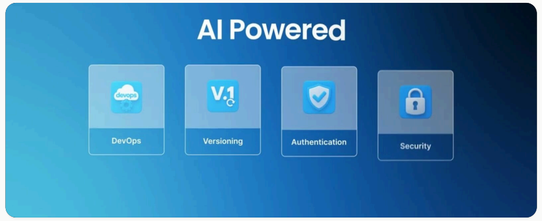

films are the demo *on Pillir's homepage.*

"See Execution in Action" and "See How It Works" on pillir.ai both play our films. Pillir's YouTube channel publishes the series under its own name.
