About *Genlook*

Genlook is a Shopify app for AI virtual try-on. Shoppers upload a photo and see themselves wearing the product before they buy.

“Let customers try-on your products, from anywhere.” Founded by Thibault Mathian. Based in Grenoble, France.

The film

WEBSITE EXPLAINER · 43 SECONDS · 16:9

01

Try-on *in two clicks.*

A motion explainer for the website. It walks a shopper through the try-on, shows the lift against a page without it, then the data Genlook captures along the way.

Social and ads

ADS · CAROUSELS · BANNERS · THUMBNAILS

01

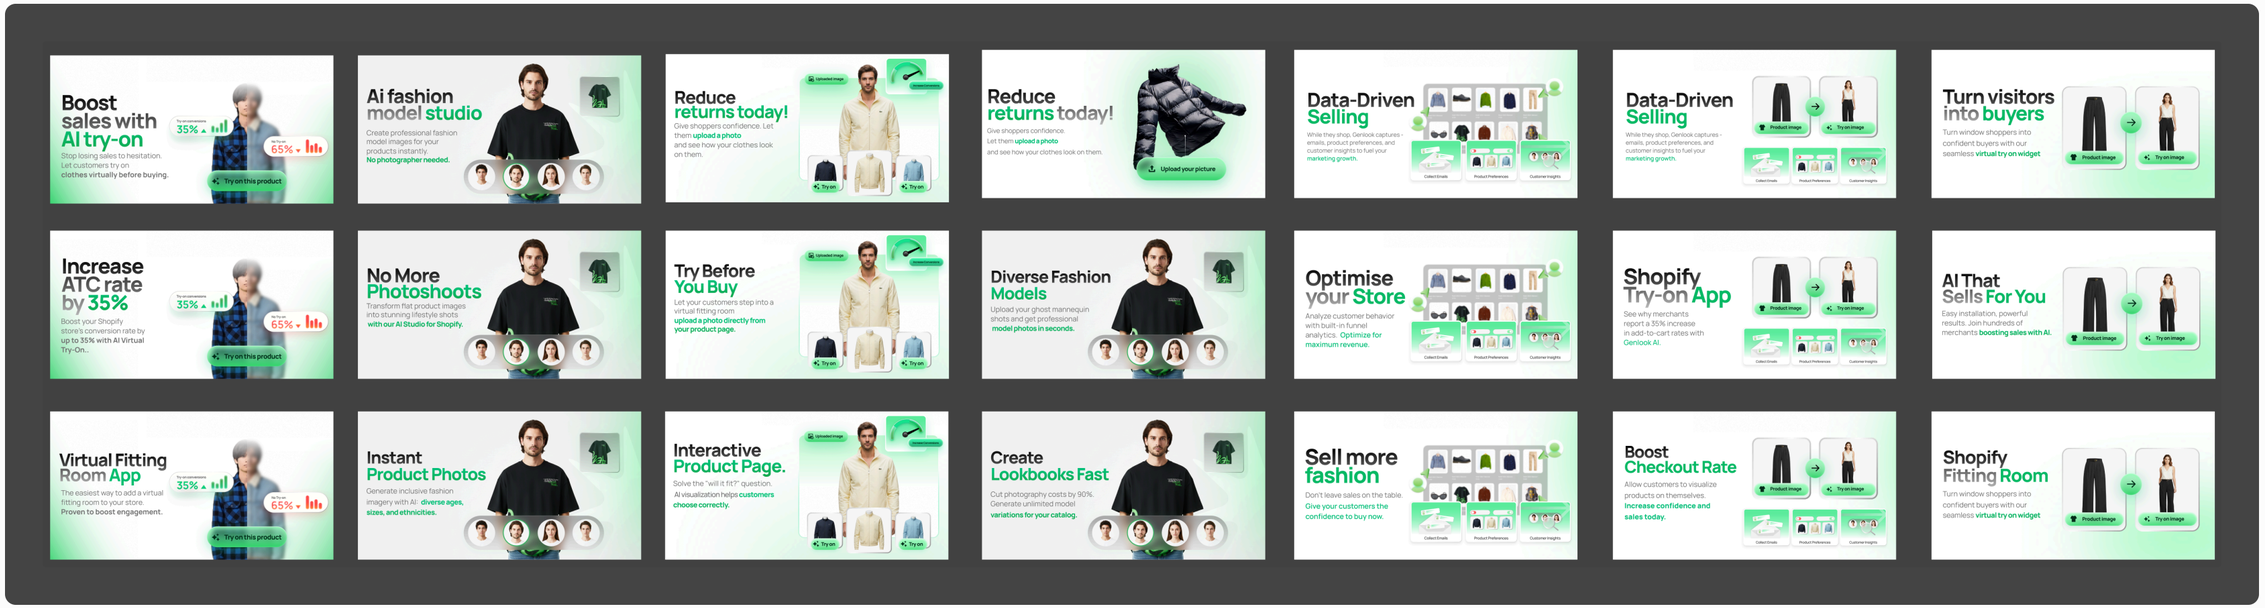
21 ad *concepts.*

Each built on the product itself: the try-on widget, the AI model studio, the analytics. Headlines tested from “Boost sales” to “Reduce returns.”

/ SQUARE AD VARIATIONS

Resized *for every placement.*

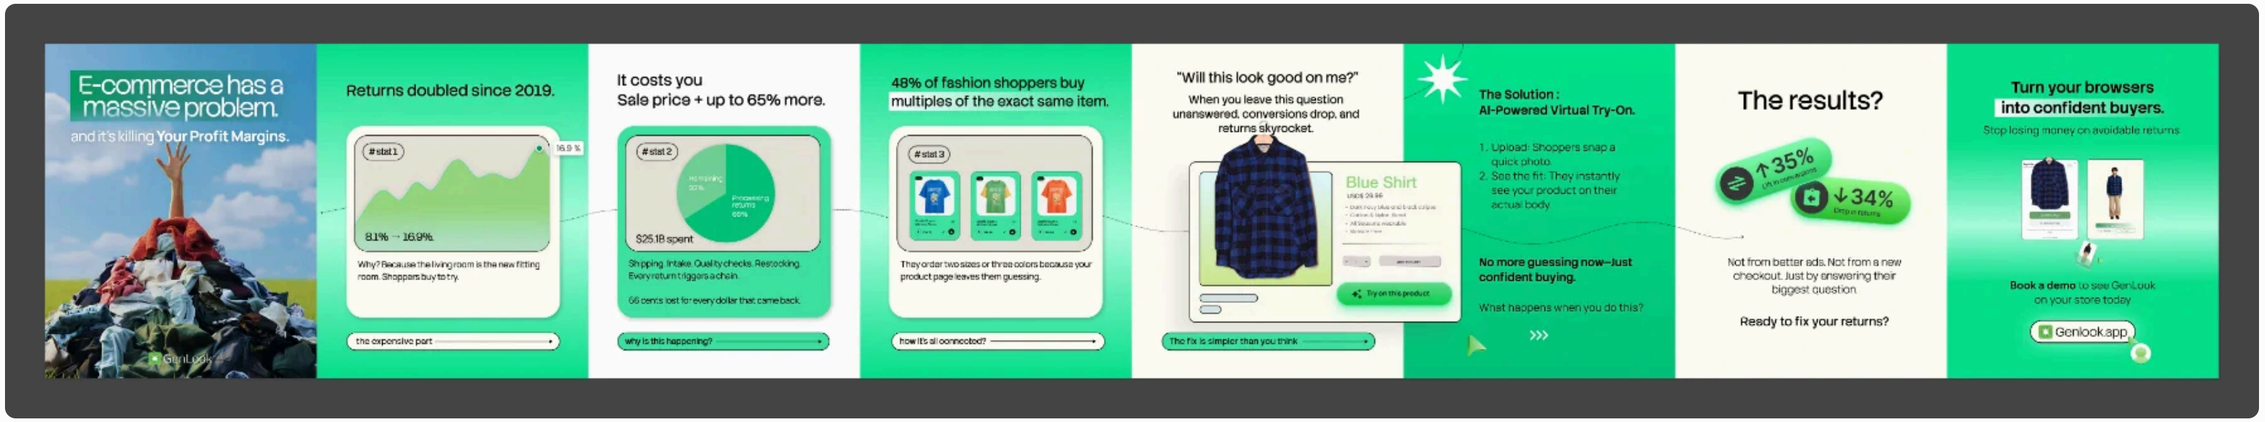
The same 21 concepts rebuilt in landscape, with copy reflowed rather than shrunk.



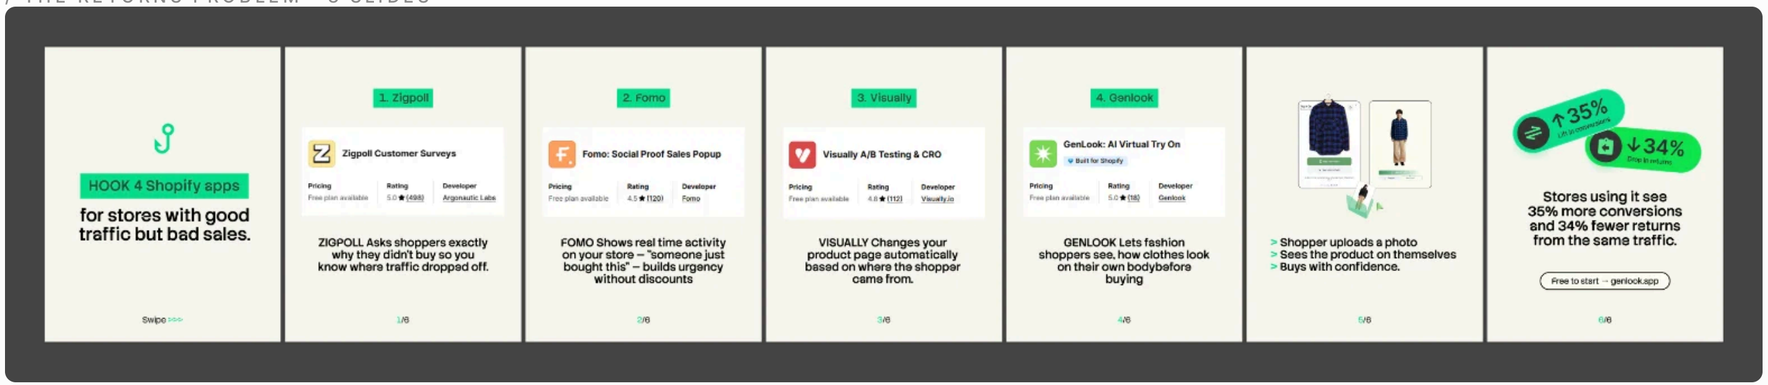
/ LANDSCAPE AD VARIATIONS

Carousels that *tell a story.*

One walks through the returns problem to the fix. The other compares four Shopify apps for stores with good traffic but bad sales.



/ THE RETURNS PROBLEM · 8 SLIDES



/ FOUR SHOPIFY APPS · 7 SLIDES

LinkedIn *banners.*

Each banner shows one feature as a before-and-after, readable at a glance.
