

THE PRODUCT EDUCATION PLAYBOOK

Turn your product into videos users learn from.

How we map your ICP, your features and your roadmap into a library of tutorials, how-tos and release videos, and where each one earns its keep.

Your product grew. Your users didn't keep up.

Every new feature adds one more thing users have to discover on their own. Most won't. They stall before they reach value, support answers the same question again, and sales demos the same workflow on every call.

Product education fixes that with short videos that teach the product once and keep working: in onboarding, in your help centre, in sales follow-ups and at every launch.

SAAS FOUNDERS | PRODUCT MARKETING | CUSTOMER SUCCESS | GROWTH

What's inside.

I The process — FIVE STEPS FROM ICP TO A FINISHED LIBRARY

II What we make — THE FORMATS A COMPLETE LIBRARY NEEDS

III How we make it — MOTION AND UI, OR ON CAMERA

IV Where it works — ONBOARDING, HELP CENTRE, SALES AND LAUNCHES

The process

ICP · FEATURES · ROADMAP · PRODUCTION · DISTRIBUTION

Five steps. One library.

We lock in who you're teaching and what they need to learn first. Production comes after, so every video has a job.

01

Lock your ICP

Who uses the product, what job they hire it for, where they stall.

02

Map features & roadmap

What you have today, what ships next, and which ICP each feature serves.

03

Plan the library

Series, formats and order. Scripts written around real workflows.

04

Capture & produce

Record, reconstruct and simplify the UI, or shoot on camera.

05

Ship & amplify

Place every video where users learn, then keep pace with releases.

STEP 01

Lock your ICP.

Before a single frame, we agree who the library is for. Roles, industries, company size, and the job each one hires your product to do.

WE ASK	Who buys, who uses, who stalls?
WE REVIEW	Onboarding, support tickets, sales calls
YOU GET	A short ICP map: 2 to 5 audiences, ranked

STEP 02

Map features and roadmap.

We list what you have today and what's coming next, then tie every feature to the audience and outcome it serves. The roadmap tells us what to plan for, so the library grows with the product.

WE ASK	What's live, what ships next quarter?
WE REVIEW	Your product, docs and changelog
YOU GET	A feature-to-ICP value map

What a value map looks like.

An illustrative map for a project-management SaaS. Each row becomes one or more videos, and every row knows who it's for.

FEATURE	STATUS	FOR	THE OUTCOME	VIDEO
Workspace setup	Live	Every new user	First project live in 10 minutes	Academy lesson
Automations	Live	Ops managers	Hand-offs that run themselves	How-to + workflow film
Client portal	Live	Agencies	Clients approve without email chains	Industry tutorial
AI summaries	Next quarter	Team leads	Weekly status without the meeting	Release video
Monthly updates	Ongoing	Existing customers	They notice what you shipped	Changelog video

STEP 03

Plan the library.

We turn the value map into series: what to make first, which format each video takes, and how they link together. Then we script each one around a real task, not a menu tour.

/ YOU GET: CONTENT PLAN + SCRIPTS TO APPROVE

STEP 04

Capture & produce.

We record your product, then reconstruct and simplify the UI so only what matters is on screen. Or we shoot your team on camera. Motion, voiceover, captions and edit, all in-house.

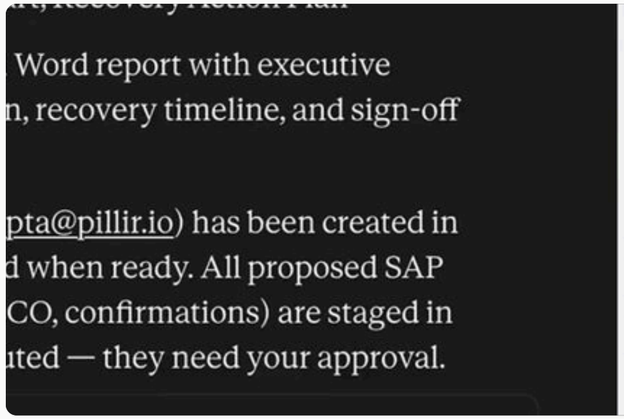

/ YOU GET: FINISHED VIDEOS, IN REVIEW ROUNDS

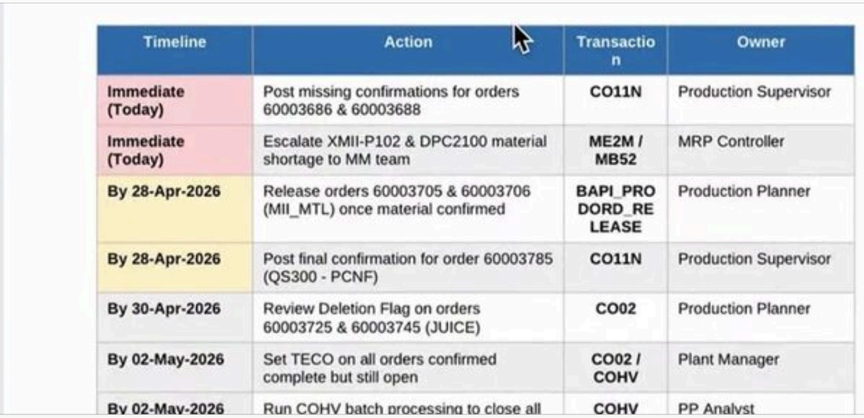

STEP 05

Ship & amplify.

Every video gets cut for the places it'll live: onboarding, help centre, YouTube, social and sales. As your roadmap ships, new releases join the library on a steady cadence.

/ YOU GET: EVERY FORMAT, READY TO PUBLISH

Timeline	Action	Transaction	Owner
Immediate (Today)	Post missing confirmations for orders 60003686 & 60003688	CO11N	Production Supervisor
Immediate (Today)	Escalate XMII-P102 & DPC2100 material shortage to MM team	ME2M / MB52	MRP Controller
By 28-Apr-2026	Release orders 60003705 & 60003706 (MII_MTL) once material confirmed	BAPI_PRODORD_RELEASE	Production Planner
By 28-Apr-2026	Post final confirmation for order 60003785 (QS300 - PCNF)	CO11N	Production Supervisor
By 30-Apr-2026	Review Deletion Flag on orders 60003725 & 60003745 (JUICE)	CO02	Production Planner
By 02-May-2026	Set TECO on all orders confirmed complete but still open	CO02 / COHV	Plant Manager
By 02-May-2026	Run COHV batch processing to close all	COHV	PP Analyst

II

What we make

ACADEMY · TUTORIALS · HOW-TOS · RELEASES · CHANGELOGS

One product. Five kinds of video.

Most teams start with one and add the rest as the library grows. Each solves a different moment in the user's life.

01

Product Academy

6 to 12 lessons that take a new user from first login to confident use.

/ WHEN: ONBOARDING

02

ICP & industry tutorials

Workflow deep dives for one role or industry, showing the outcome they care about.

/ WHEN: EVALUATION, EXPANSION

03

How-to videos

Short answers to one question. The video your support team links instead of typing.

/ WHEN: EVERYDAY USE

04

Feature releases

A focused film for each major feature, ready for the launch email, in-app and social.

/ WHEN: LAUNCH DAY

05

Changelog videos

A short monthly roundup of what shipped, so customers actually notice it.

/ WHEN: EVERY MONTH

How Airtable does it.

Airtable's video centre is a good picture of where a library ends up. One product, organised by the reason someone is watching.

You don't need all of it on day one. You need the first series that unblocks your biggest audience, built so the rest can follow.

/ SOURCE: AIRTABLE.COM/VIDEOS AND /GUIDES, NOV 2026

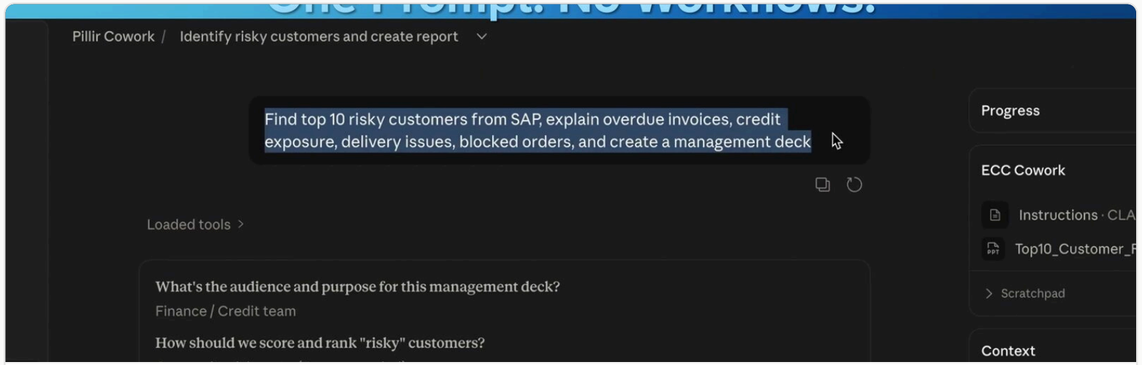

How-to in Airtable	"Tool Tips" on one feature at a time, plus a beginner's guide	HOW-TO
For teams	Airtable for Marketing Teams, for Product Teams	ICP
Guides by role	Step-by-step guides for marketers and product operations	ACADEMY
Product updates	Feature demos and a monthly "What's New (in Two)"	RELEASE · CHANGELOG
Template tours	Ready-made workflows like a product roadmap or content calendar	WORKFLOW
Industries	Solutions for retail, manufacturing, media, education and more	INDUSTRY

III

How we make it

TWO PRODUCTION FORMATS · MIX THEM AS YOU NEED

Two ways to teach. Same process.

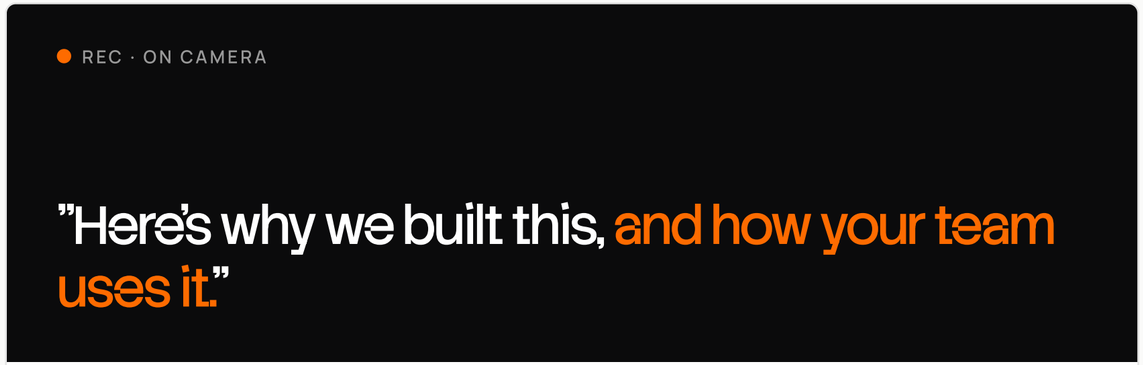

FORMAT A

Motion & UI reconstruction

We screen-record your product, rebuild the interface in motion design and strip out the noise. Zooms, highlights and callouts guide the eye, with voiceover and captions.

/ BEST FOR: HOW-TOS, ACADEMIES, FEATURES, CHANGELOGS

FORMAT B

On-camera explainers

A real person, your founder, PM or CS lead, explains the feature on camera, cut with product footage. We script, direct and run the shoot at your office, then handle the full edit.

/ BEST FOR: LAUNCHES, INDUSTRY STORIES, TRUST

Which format, when.

	A · MOTION & UI	B · ON CAMERA
Feels like	Clear, precise, polished	Human, credible, personal
Your team's time	A walkthrough and reviews	A shoot day plus reviews
When the UI changes	Rebuild the scene, keep the rest	Re-cut with new product footage
Works across languages	Swap voiceover and captions	Captions or a new take
Most teams use it for	The bulk of the library	Hero films and launches

/ WHAT WE HANDLE

ICP and feature mapping · content plan · scripts · UI capture and reconstruction · shoot direction and crew · motion design · voiceover · captions · edit · formats for every channel

/ WHAT WE NEED FROM YOU

A product walkthrough · access to a demo or staging account · your roadmap for the next quarter · one reviewer · for Format B, the people on camera and a room to shoot in

IV

Make it once. Use it everywhere.

A tutorial that only lives in the help centre is half used. Every video we make is cut for three jobs.

01 · ACTIVATE

Onboarding & in-app

Welcome emails, empty states, product tours and checklists. Users learn at the moment they need it.

/ ACADEMY · HOW-TOS

02 · SUPPORT

Help centre & success

Docs, a searchable video library, and the link your CS team sends instead of booking another call.

/ HOW-TOS · TUTORIALS

03 · GROW

Sales, launches & social

Your homepage demo, sales follow-ups, YouTube, LinkedIn and every release announcement.

/ ICP FILMS · RELEASES · CHANGELOGS

Pillir

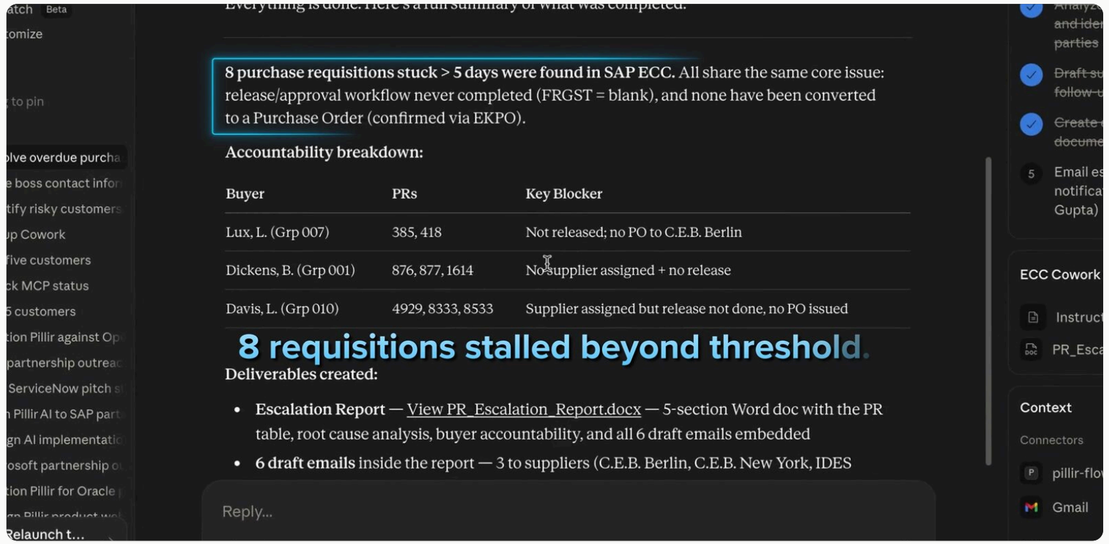

Four SAP workflows. One prompt each.

Pillir lets AI agents like Claude do real work inside SAP. We built its ICP tutorial library: four films, each for one buyer, each taking a single prompt to a finished report.

4
WORKFLOW FILMS

3
ON PILLIR'S HOMEPAGE

1
PROMPT PER FILM

> "The quality of work was outstanding. Their team understood our product deeply and delivered beyond expectations."

Vijay Raghavan · Director of India Marketing & Operations, Pillir

Bring these to the first call.

Thirty minutes is enough to sketch your ICP map and pick the first series. You'll leave with a plan, whether we make it or not.

01 Who your best customers are, and who struggles

02 The features you most want people to use

03 What's on the roadmap for the next quarter

04 Your top five support questions

05 Where you'd put the videos first
